

✓ Uygulanabilir montaj

✓ Ergonomik kullanım

✓ Prekast'a muadil

✓ Isı yalıtımı

✓ Yüksek kalite

✓ Uygun fiyat

✓ Şık Tasarım

✓ Hafif ürün

NEDEN PROKAST

Prakast'a göre daha hızlı imalat yapılabilme özelliğinden dolayı, istenilen kesit detayı hızlı ve kalıp maliyeti olmadan imal edilebilme olanağı sunar ayrıca, uygulanabilirliği hızlı ve kolay olmasından dolayı, piyasada XPS muadili ürünlere göre daha kaliteli ve sağlam bir ürün olması, ürünün yüzey sağlamlığı özellikle dolu gibi doğa olayları tahribatlarının bu malzeme ile tamamen yaşanmaması, kabuk betonun kaplandığı XPS, EPS, TAŞYÜNÜ ve GAZBETON malzemelerinin doğası gereği aynı zamanda izolasyon değerleri olduğundan ısı köprüsü ve özellikle yalı baskılarda mantolama özelliği de taşımaktadır.

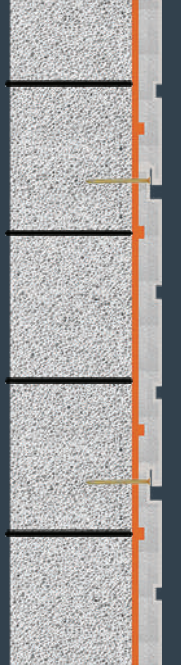

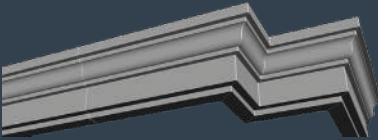

şekil a

PROKAST MONTAJI

Beyaz çimento, silis kumu ve diğer kimyasallarla hazırlanmış karışımı; EPS, XPS, taş yünü ve gaz beton gibi malzemelerin şekil a'daki gibi özel veya standart olarak belirlenmiş kesit üzerine 5-6 mm kalınlığında kabuk betondan oluşturulmuş malzeme olarak tanımlanır. Doğal rengi kirli beyaz olan PROKAST malzemesi istenilen renge boyanabilir ya da çimento karışımının içine toz boya katılarak farklı tonlarda renkler oluşturulur.

PROKAST UYGULAMASI

PROKAST malzemesi şekil a'da görüldüğü üzere profil yuvası oluşturularak uygulanacağı gibi şekil b'de duvar üzerine köpük ve yapıştırma harçları ile yapıştırılarak uygulanır. Profil yuvası olan PROPIYER malzemelerde, cephede kat silmesi, saçak silmesi vs. gibi en-boy ölçüsü büyük kesitlerde ve anatomik yapısı gereği taşıma ve bağlantı sorunu taşıyacak olan kısımlarda vida ile birlikte mekanik montaj kullanılırken; yalı baskı kaplama, pencere sövesi ve köşe kapama gibi en-boy ölçüsü küçük kesitlerdeki PROPIYER malzemelerde köpük ve yapıştırma harçları ile yapıştırılır. PROPIYER malzemelerin hepsinde ek yerlerinde, köşe yerlerinde, üst üste binen yerlerde ve PROPIYER-FARKLI malzeme ilişkisi olan ek yerlerinde poliüretan esaslı sliyon çekilerek uygulanır. (şekil c)

şekil b

NEYİN MUADİLİ

Mantolama

- Daha kaliteli görünüm
- Daha sağlam dış yüzey
- Aynı özellikte izolasyon değeri

Prekast

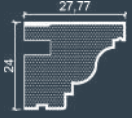

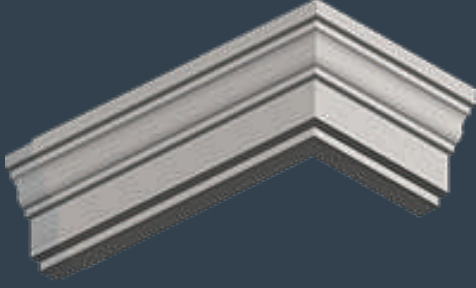

- Daha hızlı imalat
- Daha hızlı uygulama
- Daha ekonomik

Akrilik Kaplamalı Ürünler

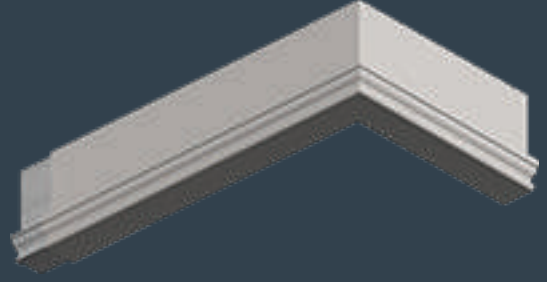

- Aynı özellikte izolasyon değeri
- Daha Kaliteli Görünüm
